**Question:** What is the range on full battery  
**Answer:** A recent trip was 2.2 miles total on asphalt with 1 very steep hill, and two medium hills. The rider was a child that weighs about 65 pounds. This used about 50% of the battery life. In Roughly 1 1/2 hours use.

★★★★★ Are you still looking for a hover board? you can stop now!

OK I don't know where to start but before I was buying hoverboards on the Amazon and those Hoverboards have been working the most for couple months before they break. I even told my kids I'm not buying hoverboards anymore! Because it's a waste of money, they just keep breaking!  
Until I bought GYROOR hoverboard! I bought one for my son and he loved it! So my second son asked me to buy one for him too. So it has been six months since we own GYROOR hoverboards and did not have any problem! So now my third son wants one too :) so I bought this hoverboard and can't be more happier with this purchase!

★★★☆☆ Very unhappy with this hoverboard.

I bought this hoverboard for my 2 kids. It arrived fairly quickly and the packaging was OK. The first problem: one side of the power supply cord was missing (power outlet plug to power transformer). I felt like returning it right then, but the kids really wanted to try it out so I had to create a makeshift connector using an old laptop power cable to charge the battery up. It took about 3 hours until it was fully charged. I emailed the seller and they sent me an entire power supply in about a week. This unit worked OK for about 2 weeks and then, suddenly, it stopped balancing, meaning the left side was tilted forward at all times while the right side was level to the ground. It was still possible to ride it, but it just wasn't right. I tried re-setting it using the manual provided to no avail. At that point I decided to return it.

Couple more notes that are not critical, but should be a good FYI for those who consider investing in this thing:  
- The smart phone app is a complete joke. You rarely see a 2.2 star reviews on Google play store, but trust

I like that it is easy to use once you learn to get on it. I thought I had mastered it after using it a few minutes but then I went on it to show my son and I went down hard. I don't know if I stepped on it wrong but I have not had any other accidents like that. Plus, I have been keeping it on the children mode which I think helps.  
The speakers sound good!  
The child setting is best for learning. It "limits" the speed to 3.6 MPH. I say "limit because" it doesn't really limit the speed. More on that later.  
  
I choose this model because I thought it is capable of going 10mph but frankly, I don't feel safe going over maybe 6 mph.

The speakers sound good! This thing seems a bit for "kidding" it "kiddos" the speed to 3.6 MPH. I say "kidding" because it doesn't really limit the speed. More on that later.

I choose this model because I thought it is capable of going 10mph but frankly, I don't feel safe going over maybe 6 mph.

Now on to the things that disappointed me.

I purchased this with the plan to use it with a cart attachment but when attached a cart to it, I found it difficult to control. The hoverboard would speed up very rapidly even when set to children mode. This
